SDEV 220

Group One Meeting Notes 4/8 – 4/12

Discussed that we will still be working as a duo since our other partners still have not responded to any messages.

We decided to split the code in half. Kizzie will do the **Sales & Customers** and I will be doing the **Products & Inventory** variables. Also, we discussed pushing everything to GitHub since that seems to be the easiest way to share things for now. Kizzie mentioned that we may have to change variables once we get the code together, but to continue what we planned for now.

The Kanban board was updated with tasks to do and tasks that have been completed.
